**Subject:** RE: IARC Monograph volume 112-- revisions needed

Hi Kate,

Hope your holidays went well and best wishes for the New Year!

I realize that time is quickly slipping away, and I just wanted to let you know that my plan is to have the revised versions for all chemicals completed by the end of the week.

Thanks,

Peter

Hi Peter!

Not to worry, there is still time to revise. You did win the prize for most assignments!

You will find Dana's reviews of Malathion Sections 1.1, 1.2, and 1.3 on IOPS (you should have received an email announcing their availability).

Don't hesitate if we can help. Thanks again for your good work!

Best regards,

Bon weekend,

Kate

Hi Kate,

Yes, as you have surmised, I misjudged the amount of time needed and got a little overwhelmed with the fifteen assignments. I apologize for the *pitoyable* state of the results. I welcome the opportunity to revise before further review. Thank you for sending the reviews and the link to the TCE example, it should prove to be very helpful.

*Merci,*

Peter

**Subject:** IARC Monograph volume 112-- revisions needed  
**Importance:** High

Bonjour Peter!

I hope you are well! Thank you for your submissions of the draft Sections 1.1, 1.2. and 1.3 for monograph 112.

In reviewing these, we find that significant revision will be needed. Appended please find specific comments on the Malathion Section 1.2 Word document, as well as peer comments on Section 1.3 (also available on IOPS). These comments on Malathion apply equally to all the other drafts. Importantly, a reference list should be included for all sections.

We suggest you review these appended comments and revise the Malathion drafts accordingly, following the instructions to authors ([http://iops.iarc.fr/index.php?page=instructions&project\\_id=118&instruction\\_id=17](http://iops.iarc.fr/index.php?page=instructions&project_id=118&instruction_id=17)) and the TCE example for Sections 1.1 and 1.3 (<http://monographs.iarc.fr/ENG/Monographs/vol106/index.php> ).

We'll be happy to take a quick look at the revised Malathion drafts before you revise the others if that would facilitate your work. We will solicit peer review comments from Working Group members once all drafts are returned.

Don't hesitate with any questions. Thank you again for your efforts!

Best regards,

Kate (and Dana)
